

TTO THERMOSTAT

S400 series thermostats are LCD digital display and week programming heating thermostats.
To control electric load or electrical valves in electric heating system or water heating system

S400 series of digital thermostats

Feature:

1. LCD display, relay contact form output.
2. With LED back light, elegant appearance.
3. Temperature resolution: 0.1°C.
4. With sensor selection function.
5. Week programming, four periods for setting the time and temperature.
6. Key lock function, can prevent misoperation of others.

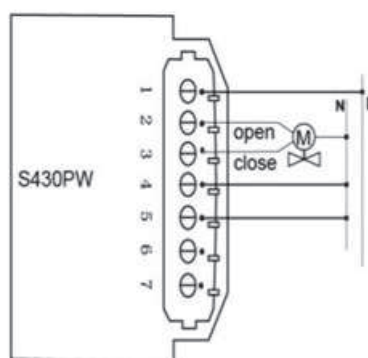

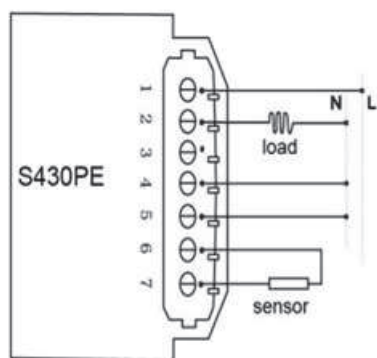

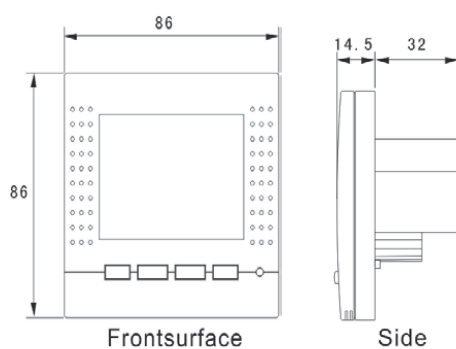

Technical parameter:

- ◆ Working Voltage: 220VAC±10%
- ◆ Working Environment: Temperature: 0°C~50°C
Relative Humidity: RH<85%
- ◆ Storing Environment: Temperature: -10°C~50°C
Relative Humidity: RH<85%
- ◆ Temperature Control Range: 5°C~45°C
- ◆ Temperature Control Precision: 0/-2°C
- ◆ Grade of Protection: IP40
- ◆ Installation: 86 type standard box

TTO THERMOSTAT

Model spec:

Model	Time period programming	External sensor	Back light	Mainframe linkage	Current load	Wire diameter
S430PE	√	√	√		≤16A(resistive load)	2.5mm ² (14AWG)
S430PW	√		√		≤3A(resistive load)	0.75mm ² (18AWG)
